This 15" woofer is designed to work in bass reflex systems and folded horn bins to produce deep bass with low distortion at high power levels. The very high sensitivity (100 dB) and exceptional power handling (350 W) result from the very large diameter magnet (9") coupled with a 4" edgewound flat copper wire voice coil mounted onto a fiberglass reinforced Kapton former. The magnet has a vented pole piece and is heatsinked to the Zamak chassis to maximize heat dissipation. Gold plated binding posts fitted onto the Ultra stiff die cast chassis are designed to accept large diameter cables. The "suggested applications" charts indicate various driver loads. The response curves shown on the diagram indicate the predicted low end response of the driver in the suggested box volume (Vb) with suggested port (Dp-Lp).

Ce woofer de 380 mm est particulièrement destiné à la reproduction des graves à fort niveau et sans distorsion dans des systèmes bass reflex ou à pavillon replié. Son très haut rendement (100 dB) et sa très forte tenue en puissance (350 W) résultent de l'utilisation d'une large structure magnétique (225 mm) associée à une bobine de 100 mm sur support Kapton renforcé fibre de verre à fil de cuivre plat sur chant. Le châssis ultra rigide en Zamak moulé à ailettes de refroidissement et le noyau ventilé assurent une dissipation optimale de la chaleur. Les borniers plaqués or permettent l'utilisation de câbles de forte section. Le tableau "Suggested applications" indique différents types de charge. Les courbes publiées correspondent à la réponse dans le grave pour un volume (Vb) et une dimension d'évent donnée (Dp-Lp).
