

W6520R-4 6.5" Mid Woofer

Our Eclipse line featured a similar model some years ago with a traditional stamped basket and poly/rubber cone similar to the W1238R and W1038R woofers. A new and improved version presented itself and with a little tweaking, we have a very attractive, made in the USA mid woofer comparable to some of the European designs.

The W6520R features a cast aluminum basket, Abaca fiber cone and NBR rubber surround and copper capped pole piece for low distortion.

- Imp - 4 ohm
- F_s - 39Hz
- Q_{ts} - .428
