176 WR 33 102 SD 4Ω

A high quality 6½" wofer with Peerless' "Sandwich" cone and a heavy magnet.

This 6½" wofer is a 4Ω version of the 850118 CSC wofer.

The lower Q favours application in smaller reflex boxes of 7-30 ltrs. as well as use in even smaller closed boxes down to 4 ltrs. It can also be used in even smaller boxes if the box is well-damped, but it should then be noticed that it can only be done on the cost of bass response.
