High quality 6½" woofer with Peerless' "Sandwich" cone, a heavy magnet, and a short circuiting ring to reduce distortion in the magnet system.

This 4Ω version of the 850122 CSX woofer has lower Q and gives extra well-controlled bass. The low Q favours application in smaller reflex boxes and in bass reflex boxes of 7-30 ltrs. Furthermore, it is recommended for use in small closed boxes down to 4 ltrs. and, at the cost of bass response, it is also suitable for use in even smaller boxes, provided that the cavity is damped appropriately. It can also be used as high-end midrange or in satellite systems.
