## **OF NORWAY**

## WOOFER

## P17REX/P

P17REX/P is a 6,5" High Fidelity woofer with an injection moulded metal chassis. A polypropylene based cone, a bullet shaped phase plug and a high loss rubber surround are carefully matched to each other, resulting in an outstandingly smooth frequency response. The unit has a high power handling capacity due to its relatively large voice coil diameter. The magnet system has a T-shaped cross section of the pole piece for low modulation distortion. The phase plug reduces compression due to temperature variations in the voice coil, eliminates resonances that would occur in the volume between the dust cap and the pole piece and increases the long term power handling capacity. A large magnet system provides high efficiency and low Q.

NOTES			
-			

OCT. 96 W17-412

Response curve recorded in anechoic chamber (Free-field, 4 pi radiation) with 0.5m microphone distance. The loudspeaker is mounted in a closed box of 12 l net volume.
