

## **27TDF** H1211

27TDF is a High Definition precoated fabric dome tweeter with a wide, soft polymer surround.

Sonotex precoated fabric diaphragm with high consistency and excellent stability against variations in air humidity

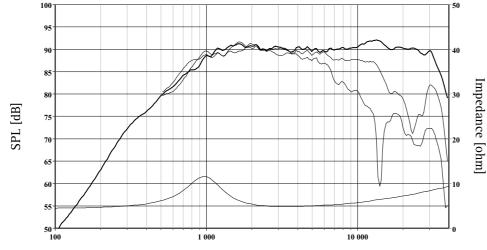

Sonomax surround for low resonance and excellent mechanical linearity.

Voice coil windings immersed in magnetic fluid increase short term power handling capacity and reduce the compression at high power levels.

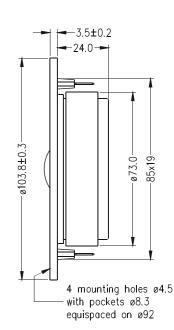

Optimally damped cavity in the pole piece controls and slightly lowers the fundamental resonance.

The chassis is precision moulded from glass fibre reinforced plastic, and its front design offers optimum radiation conditions.

## Frequency [Hz]

The frequency responses above show measured free field sound pressure in 0, 30, and 60 degrees, mounted in a 0.6m by 0.8m baffle. Input 2.83 Vrms, microphone distance 0.5m, normalized to SPL 1m. The impedance is measured without baffle using a 2V sine signal.
